WATER HEATING					
<i>List water heaters and boilers for both domestic hot water (DHW) heaters and hydronic space heating. Individual dwelling DHW heaters must be gas or propane fired, and may not exceed 50 gallons. Hot water pipe insulation from the DHW heater to the kitchen(s) and on all underground hot water pipes is required in all component packages in all climate zones.</i>					
Water Heater Type/Fuel Type ^{1,2}	Distribution Type (Standard, Recirculation) ³	Number In System	Tank Capacity (gal)	Energy Factor or Thermal Efficiency	Tank Insulation R-Value ⁴
	STANDARD	1			R-12
<ol style="list-style-type: none"> 1. Indicate Type (Storage Gas, Heat Pump, Instantaneous, etc.) 2. The new water heater type shall be limited to natural gas, liquefied petroleum gas, or the existing fuel type. 3. Recirculating systems serving multiple dwelling units shall meet the recirculation requirements of §150(n). The Prescriptive requirements do not allow the installation of a recirculating water heating system for single dwelling units. 4. The external water heating tank and pipes shall be insulated to meet the requirements of §150(j). 					

Responsible Building Designer's Declaration Statement	
<ul style="list-style-type: none"> • I am eligible under Division 3 of the California Business and Professions Code to accept responsibility for the building design identified on this Certificate of Compliance. • I certify that the energy features and performance specifications for the building design identified on this Certificate of Compliance conform to the requirements of Title 24, Parts 1 and 6 of the California Code of Regulations. • The building design features identified on this Certificate of Compliance are consistent with the information provided to document this building design on the other applicable compliance forms, worksheets, calculations, plans and specifications submitted to the enforcement agency for approval with this building permit application.
