

Attachment X – Local Amendments Matrix

Purpose: This matrix identifies all local amendments to the model codes adopted by the City of Daly City, the corresponding municipal code sections, the model code sections affected, the type of amendment (Added, Deleted, Amended), and the justification for each amendment as required by California Health & Safety Code §17958.7.

Column Definitions:

Column	Description
Muni-Code Sec.	Daly City Municipal Code section where the amendment is codified.
Code Sec.	Code Sec. – Model code section affected, prefixed by the model code acronym: CBC – California Building Code ; CRC – California Residential Code ; CMC – California Mechanical Code; CPC – California Plumbing Code; CEC – California Electrical Code; CFC – California Fire Code; CEBC – California Existing Building Code; CEnC – California Energy Code; CalGreen – California Green Building Standards Code; IPMC – International Property Maintenance Code; CRSC – California Reference Standards Code
Amendment Title	Short description of the amendment's subject.
A	Checkmark indicates a section added to the model code.
M	Checkmark indicates a section amended from the model code.
Just.	Letter(s) corresponding to the Justification Key (see below).

Justification Key:

Letter	Finding of Fact
CL = Climatic	Daly City is situated within a coastal marine climate zone, characterized by persistent fog, high humidity, and frequent seasonal rainfall. These conditions can accelerate deterioration of building materials through corrosion, rot, and mold growth. Periodic high winds and salt-laden air from the Pacific Ocean increase wear on exterior finishes, roofing, and structural elements.
GE = Geographic	Daly City's location on the San Francisco Peninsula places it in one of the most seismically active regions in the world, adjacent to the San Andreas Fault and near several other significant fault lines. This proximity necessitates enhanced design and construction measures to address earthquake resilience and post-disaster functionality.
TO = Topographic	Daly City features a varied topography with numerous hills, steep slopes, and irregular lot configurations. Elevation changes and slope instability can create drainage issues, erosion risks, and challenging construction conditions. Local amendments may be necessary to ensure proper grading, foundation design, and slope stabilization, as well as to address emergency vehicle access to hillside neighborhoods.
AD = Administrative	These amendments are administrative in nature and do not modify a California Building Standard. Instead, they establish local processes, authority, and enforcement procedures to ensure effective application of the building codes in Daly City. Administrative provisions may include permitting procedures, fee schedules, timelines for approvals, inspection requirements, and coordination with other departments and agencies.

Universal Local Amendment Matrix

Muni-Code Sec.	Code Sec.	Amendment Title	A	M	Just.
15.00.010	Gen	Administrative Authority – Terms Explained	X		AD
