

Pamela DiGiovanni

As your Councilmember, I prioritized our community safety during the Covid-19 pandemic. I worked on a daily basis ensuring equal access for all members of our community at testing and vaccination sites. I fought for and approved hazard pay for our grocery and frontline workers. I led and will always lead all efforts to keep Seton Medical Center open and ensure our medical workers receive just compensation.

Daly City has been my home for thirty years but I never lost track of the issues that affect us. I supported Measure Q which led to an expansion of public safety services and restored Engine 95, extended library hours, and grew city services for children, teens, and seniors.

As an advocate for public safety, I have worked on getting funding for safe routes to schools, prioritized a pedestrian first approach to city planning, and began organizing meetings with state leaders and agencies to address our ongoing streetlight outages. We have accomplished a lot, but there is much more we can do together as a community.

I am proud to be endorsed by our Daly City Firefighters, Police, nurses, teachers, labor, veterans, and many more.

I would be honored to receive your vote to continue serving as your Councilmember.
