

Super Compost

Republic Services' Super Compost is produced at Newby Island Resource Recovery Park from 100% post-consumer recycled content. Registered as organic and intended for the use in organic farming by the California Department of Food & Agriculture, our product is safe for use as an organic soil amendment and soil conditioner.

Super Compost has been properly heated, aged, screened, and tested to ensure compliance with nutrient guarantees, pathogen reduction, contaminant removal, and product consistency.

Specifications	Particle Size
OMRI Listed®/STA Certified CDFA- Organic Input Material Caltrans- Fine Compost CalRecycle- SB 1383 compliant	$\geq 95\%$ passing through 3/8" screen

Application

Apply at a thickness of 1-3" depending on existing soil health. Work into soil at a depth of 1-6" depending on application type.

Benefits

- Sustainable nutrient inputs
- Increased water retention
- Improved soil structure
- Supports healthy soil organisms
- Closed-loop organics recovery
